Automated implementation of M2

Spend time being creative

Scalable seamless hosting

- Elastic M2 server environment (CPU, Memory & Traffic) with autoscaling
- At least two servers operating all the time
- You only pay for what you use in any given moment

Full toolbox for development, building and debugging

- Customization via git, composer and build pipeline
- All M2 cron tasks are managed by a separate node
- Heavy background activity will not affect the performance of the webshop
- Live access to database tools and streaming logs

Google image service

- Images are stored, scaled, cached and served via Google Cloud
- This ensures low latency from a highly optimized cookieless infrastructure
- Reduces load on M2 instances

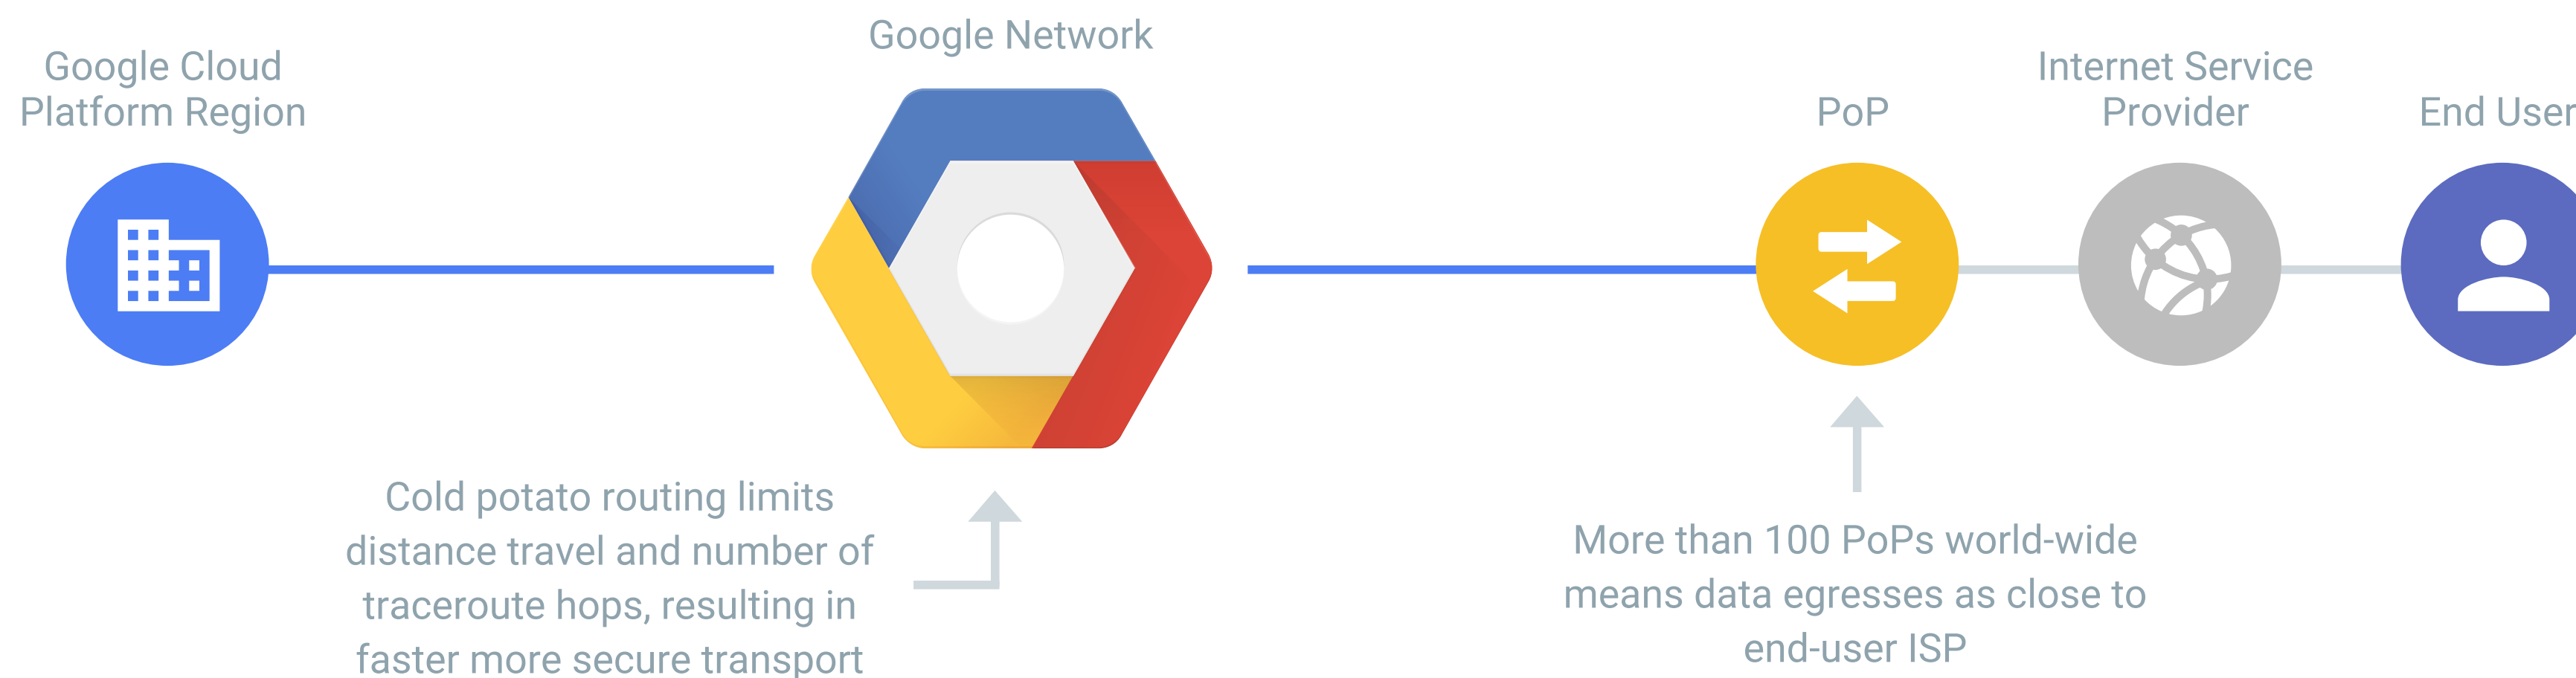

Free SSL certificates

- All webshop instances support SSL
- Automatic installation and certificate renewal
- Domains added by the end user will automatically be issued an SSL certificate

Google Premium Tier Network

- High performance routing
- Network services such as Cloud Load Balancing are global (single VIP for backends in multiple regions)
- High performance and reliability, Low latency, Global SLA
- Performance, reliability, global footprint and user experience are your main considerations

Support

Support

Hosting incidents

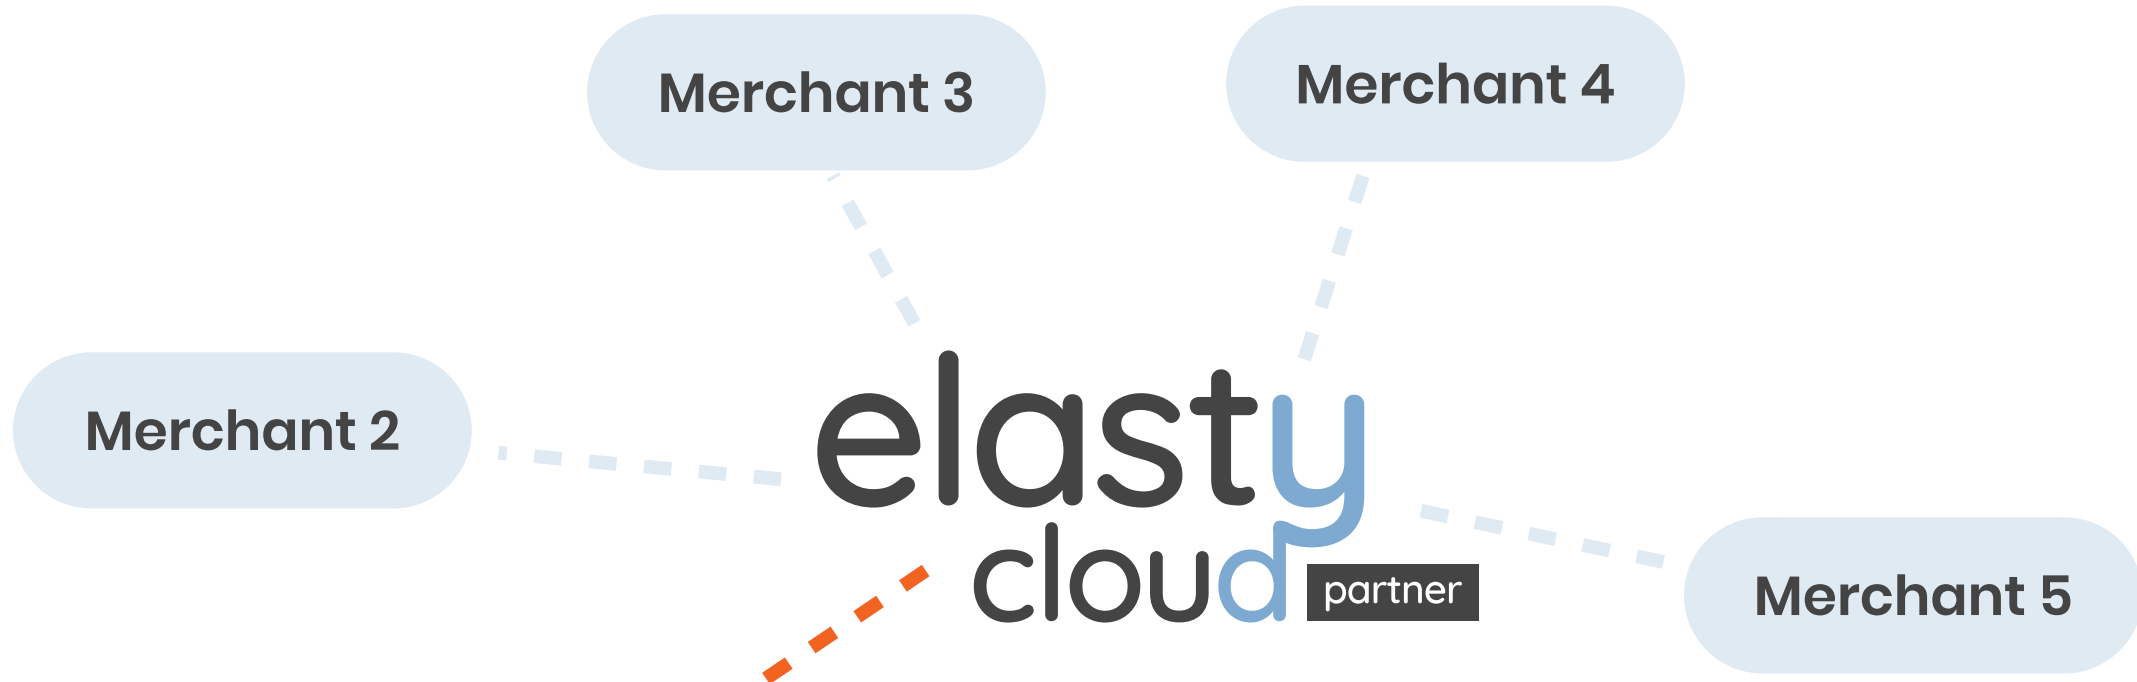

Tickets created by monitoring

- 24/7 monitoring with realtime service status dashboard
- Partner has access to dashboard showing status per End-User
- elasticsearch will inform Partner immediately if there are any hosting problems caused by Google Cloud, elasticsearch, Partner or the End-User
- Service Level Objective: Monthly Uptime Percentage > 99.9%

Support issues

Tickets created by a person (Partner or End User)

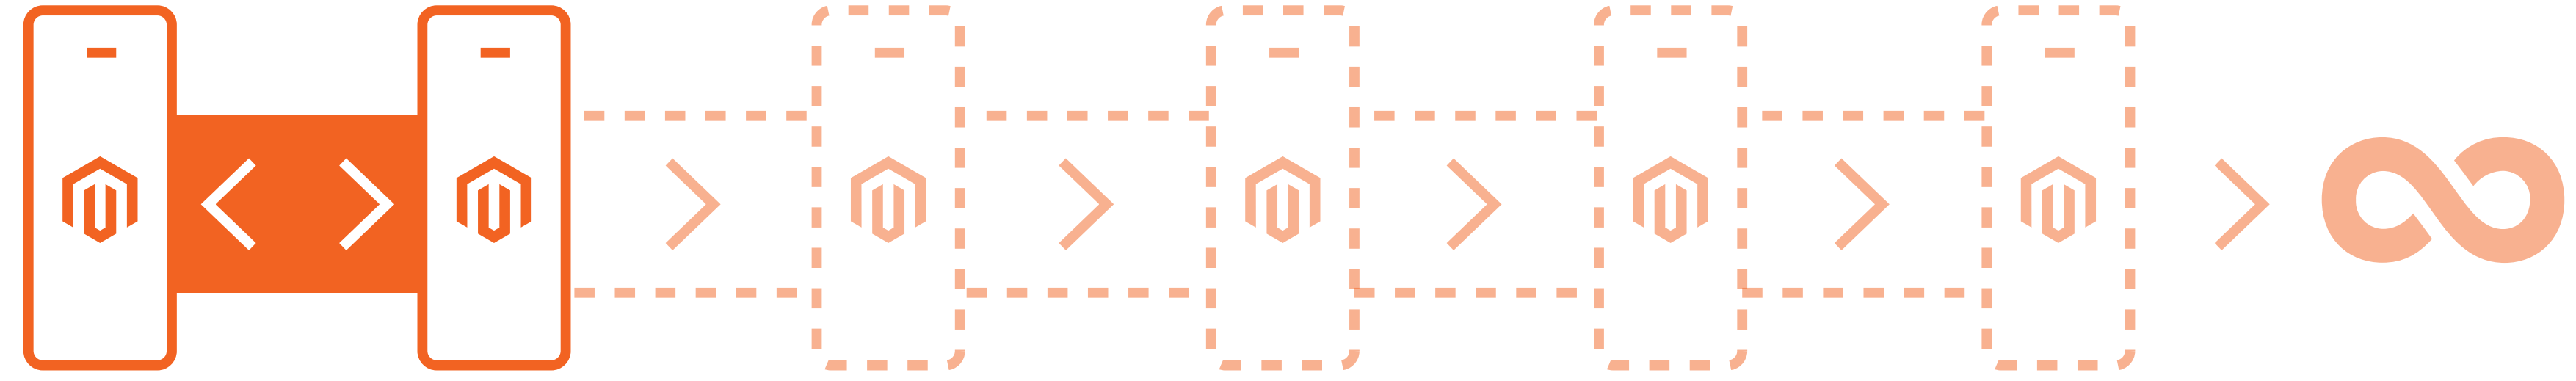

- elasticsearch is responsible for tickets created by Partners
- Partners are responsible for tickets created by their End Users.

One-click implementation
Magento 2 Store

Merchant 1

Reach new customers of any size

- One click M2 deployment in 60 seconds
- Save 50-100 hours for every new instance
- Able to offer prospect customers the chance to test M2 in a demo account
- M2 optimized elastic server environment
- Full toolbox for development, building and debugging
- Managed 24/7 hosting and support
- You only pay for what you use
- Focus on being creative

Pricing (USD)

As a partner, you pay a fixed monthly fee regardless of the number of clients. In addition, you pay for the actual resources used by your clients. A higher partnership level comes with a higher monthly fee and lower rates for the resources used.

<i>No setup fee</i>	Blue (0 - 25 000 CPU / h)	Silver (25 000 - 100 000 CPU / h)	Gold (+100 000 CPU / h)
Monthly fee <small>One high memory database instance included</small>	299	799	999
CPU / h	0.084	0.062	0.05
Egress traffic Google network / GB	0.24	0.21	0.18
Extra high memory DB instance	260	260	260

Each DB instance can handle about 20 normal traffic e-commerce sites (≈3 000 visitors / day and 1% conversion rate per site).

Prices include storage, backup, monitoring and support.

Monthly fee and extra database instances will be charged quarterly in advance.

Used traffic and CPU will be charged in arrears.
